LANGUAGE

- English
- Bosnian - Native

PERSONAL SKILLS

- Teamwork
- Communication
- Creativity
- Open-minded & Curious
- Thinking Out of the Box

SELECTED PROJECTS

Renor Platform

<https://renor.nl/>

It is a software that will be used in energy renovations and through which communication between customers, energy specialist and the renovation companies will be performed. Software will be used for planning, monitoring, maintenance and executing energy renovations. Technologies that I used for this projects are: React, Tailwind, Typescript

Ordres app

<https://www.ordres.eu/>

Ordres app is made for restaurants around the EU. Guests can place an order within a few clicks or simply by scanning the QR code to access the restaurant menu and place an order, thus reducing the time for both customer and the restaurant. And also the app is there to provide restaurants with various benefits such as statistics, the most popular deals, customer satisfaction, etc. Technologies that I used for this projects are: React, React Native, Tailwind, Typescript

Dnevno.me

<https://dnevno.me/>

Dnevno.me is one of the leading news sites in Montenegro with hundreds of thousands of regular visitors that is updated daily by a large team of journalists
